## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 13-15 and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 13 and 17 recites the broad recitation "multiple ways", and the claim also recites "one of the ways" which is the narrower statement of the range/limitation.

In claim 20, "outgoing ports that are configured to receive non-augmented FC frames are further configured" lacks a proper antecedent basis in claim 11 since there is no recitation of any non-augmented FC frames nor any outgoing ports that are configured to receive these frames.

***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1-10 are directed to a carrier signal which is not considered an article of manufacture since it is intangible. Therefore, the claims do not conform to any statutory class.

Further, the claimed subject matter is directed to an abstract idea (nonfunctional descriptive material per se) since the claimed data structures lists the particular fields and their contents, rather than defining any structural and functional interrelationships between the data structure and other claimed aspects of the invention which permit the data structure's functionality to be realized (see MPEP 2106.01 Computer-Related Nonstatutory Subject Matter).

***Allowable Subject Matter***

5. Claims 11, 12, 16 and 21-40 are allowed.
6. Claims 13-15 and 17-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
7. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach the FC frames that are augmented or includes a supplemental header.
